

THE CENTER FOR AFRICAN STUDIES

honors

WORLD AIDS DAY

with a viewing followed by
discussion of selections from

"SCENARIOS FROM THE SAHEL"

A collection of 13 short fiction films about HIV/AIDS by internationally acclaimed African directors. The films are based on ideas thought up by talented young Africans and range from extremely funny to profoundly touching. The message is one of hope, optimism and empowerment. The films are intended to encourage frank discussion of AIDS among young Africans. We will discuss the films, their content, and why these films have been so popular with NGOs and teachers in West Africa.
